

# Yasuhiro Sato, Ph.D.

Last update on 4 August 2025

---

## Curriculum Vitae

First Name: Yasuhiro

Family Name: Sato

Pronoun: he/him

Current affiliation: Faculty of Environmental Earth Science, Hokkaido University

Institutional address: N10W5 Kita-ku, Sapporo 060-0810, Hokkaido, Japan

E-mail: yassato"at"ees.hokudai.ac.jp; yassato36c"at"outlook.com

ORCID: 0000-0002-6466-723X

ResearcherID: N-7939-2013

Google scholar citations: <https://scholar.google.co.jp/citations?user=HbrGYr8AAAAJ&hl=en>

Personal website: <https://yassato.github.io/>

## Education

- 23 March 2016. PhD in Science (Biosciences), Center for Ecological Research, Graduate School of Science, Kyoto University, Japan (supervisor: Prof. Dr. Hiroshi Kudoh) [Thesis title: Associational anti-herbivore defense in the trichome dimorphism of *Arabidopsis halleri* subsp. *gemmifera* (Brassicaceae); available at <https://doi.org/10.14989/doctor.k19536>]
- 25 March 2013. MSc in Science (Biosciences), Center for Ecological Research, Graduate School of Science, Kyoto University, Japan (supervisor: Prof. Dr. Hiroshi Kudoh)
- 24 March 2011. BSc in Agriculture (Bioresource Sciences), Laboratory of Insect Ecology, Faculty of Agriculture, Kyoto University, Japan (supervisor: Assistant Prof. Dr. Takayoshi Nishida)

## Employment history

- April 2024–Present. Tenure-track Assistant Professor in the Group of Ecological Genetics, Section of Environmental Biology, Faculty of Environmental Earth Science, Hokkaido University, Japan
- April 2021–March 2024. Senior research and teaching assistant (Oberassistent) at the Department of Evolutionary Biology and Environmental Studies, University of Zurich, Switzerland (PI: Prof. Dr. Kentaro K. Shimizu)
- October 2017–March 2021. Junior Group Leader of Precursory Research for the Embryonic Science and Technology (PRESTO) program of the Japan Science and Technology Agency (JST) at Ryukoku University, Japan (host: Associate Prof. Dr. Atsushi J. Nagano)
- April 2016–September 2017. Independent Postdoctoral Fellow of the Japan Society for the Promotion of Science (JSPS) at Ryukoku University, Japan (host: Senior Lecturer Dr. Atsushi J. Nagano)
- April 2015–March 2016. Research Fellow of the Japan Society for the Promotion of Science (JSPS) for PhD students at Kyoto University, Japan (host: Prof. Dr. Hiroshi Kudoh)
- June 2013–March 2014. Research Assistant at the Center for Ecological Research, Kyoto University, Japan

## Visiting and guest position

- October 2017–March 2024. Guest researcher of Research Institute for Food and Agriculture, Ryukoku University, Japan
- August 2017–December 2024. Affiliated member of University Research Priority Program for Global Change and Biodiversity (URPP GCB), University of Zurich, Switzerland <https://www.gcb.uzh.ch/en/aboutus/people.html>
- June 2016–September 2016. Visiting postdoctoral researcher, Evolutionary and Ecological Genomics Group (Shimizu Lab), University of Zurich, Switzerland
- April 2016–March 2020. Affiliated scientist of the Center for Ecological Research, Kyoto University, Japan

## Approved funding and fellowships

1. April 2025–March 2029. ‘From varieties to variety mixtures: measuring and modeling interactions and developing methods for optimizing variety combinations’, Grant-in-aid for Scientific Research (A), Grant ID:JP25H00928, Japan Society for the Promotion of Science (JSPS), Japan (co-investigator; direct cost 3,200,000 JPY + indirect cost 1,200,000 JPY)
2. October 2024–March 2028 [Phase I]. ‘Establishment of quantitative ecological genetics for the control of plant-plant interactions’, Fusion Oriented REsearch for disruptive Science and Technology (FOREST), Japan Science and Technology Agency (JST), Japan (principal investigator; direct cost 50,000,000 JPY + indirect cost 15,000,000 JPY)
3. November 2023–October 2024. ‘Using open data to reveal the genomic basis that underpins positive plant-plant interactions’, Spark rapid funding, Grant ID:CRSK-3\_221418, Swiss National Science Foundation (SNSF), Switzerland (principal investigator; total budget 100,000 CHF = 103,616 EUR upon the currency rate of the starting date)
4. April 2023–March 2027. ‘Joint analysis of plant-plant interactions using field GWAS and RNA-Seq’, Grant-in-aid for Early-career Scientists, Grant ID:JP23K14270, Japan Society for the Promotion of Science (JSPS), Japan (principal investigator; direct cost 3,600,000 JPY + indirect cost 1,080,000 JPY = 32,116 EUR upon the currency rate of the starting date)
5. April 2020–March 2023. ‘Theoretical consideration of plant biodiversity effects driven by inter-genotypic interactions’, Grant-in-aid for Early-career Scientists, Grant ID:JP20K15880, Japan Society for the Promotion of Science (JSPS), Japan (principal investigator; direct cost 3,200,000 JPY + indirect cost 960,000 JPY = 35,049 EUR upon the currency rate of the starting date)
6. October 2017–March 2021. ‘Large-scale omics approach towards a pest control by mixed planting’, PRESTO project, Grant ID:JPMJPR17Q4, Japan Science and Technology Agency (JST) (principal investigator; direct cost 40,000,000 JPY + indirect cost 12,000,000 JPY = 391,418 EUR upon the currency rate of the starting date + group leader’s own salary) [https://www.jst.go.jp/kisoken/presto/en/project/1112074/1112074\\_26.html](https://www.jst.go.jp/kisoken/presto/en/project/1112074/1112074_26.html)
7. April 2016–September 2017. ‘Genome-wide association study and prediction of pest communities on natural accessions of the model plant species’, Research Fellowships for Postdoctoral Researcher, Grant ID:JP16J30005, Japan Society for the Promotion of Science (JSPS) (principal investigator; direct cost 2,700,000 JPY + indirect cost 810,000 JPY = 27,449 EUR upon the currency rate of the starting date + fellow’s own salary)
8. April 2015–March 2016. ‘A test of the mechanism maintaining plant defense polymorphism in a wild *Arabidopsis*’, Research Fellowships for PhD Students, Grant ID:JP15J00400, Japan Society for the Promotion of Science (JSPS) (principal investigator; direct cost 1,200,000 JPY + indirect cost 360,000 JPY = 12,101 EUR upon the currency rate of the starting date + fellow’s own salary)

## Mentoring

1. Iqra Akram (PhD student at Hokkaido University; Role: supervisor)
2. Lukas Rohr (Master student at the University of Zurich; Role: co-supervisor)
3. Dr. Chongmeng Xu (former PhD student at the University of Zurich, PhD defended on 17 April 2023; Role: co-supervisor as ‘Leitung der Dissertation’)

4. Elina Jansone (Undergraduate internship at the University of Zurich; Role: supervisor)
5. Kazuya Takeda (Research assistant at Ryukoku University; Role: daily supervisor as an employer)
6. Silvija Milosavljevic (Undergraduate internship at the University of Zurich; Role: co-supervisor)
7. Dimitri Anderfuhren (Undergraduate internship at the University of Zurich; Role co-supervisor)

## Teaching experience

1. April 2025–Present. Introduction to Environmental Earth Science, Hokkaido University, Japan (Role: co-instructor)
2. April 2024–Present. Environmental Biology II, Hokkaido University, Japan (Role: co-instructor)
3. April 2024–Present. Fundamental Course in Ecology, Hokkaido University, Japan (Role: co-instructor)
4. April 2024–Present. Natural Science Experiments, Hokkaido University, Japan (Role: co-instructor)
5. May 2024. Special Lecture of Agricultural and Environmental Biology, University of Tokyo, Japan (Role: one-time guest lecturer)
6. September 2021–March 2024. BIO373: Next Generation Sequencing for Evolutionary Functional Genomics, University of Zurich, Switzerland (Role: course management, co-instructor, and examiner; No. of participants = 15-20)
7. May 2022. BIO334: Practical Bioinformatics, University of Zurich, Switzerland (Role: temporal co-instructor during a sabbatical absence of PI; No. of participants = ca. 25)
8. April 2019–May 2019. External Lecturer of Basic Genetics, Faculty of Agriculture, Ryukoku University, Japan (Role: 90-min. lectures × five times for a liberal art course in Japanese; No. of participants = ca. 50)
9. July 2018–August 2018. International Biology Undergraduate Summer School (BUSS) 2018, University of Zurich, Switzerland (Role: supervision of undergraduate student’s fieldwork and presentation; No. of participants = 1)
10. July 2017–August 2017. BIO378: Research Practical in Evolutionary Biology and Systematics, University of Zurich, Switzerland (Role: supervision of undergraduate student’s fieldwork, data analysis, and report writing; No. of participants = 1)
11. September 2013–January 2015. External Teaching Assistant of Programming Practical, Faculty of Science and Technology, Ryukoku University, Japan (Role: teaching assistant of R language; No. of participants = 5-10)

## Panels, boards, and reviewing activities

1. April 2025–Present. Associate Editor of *Plant Species Biology*
2. April 2024–Present. Organizing committee member of the poster presentation for high-school students, Ecological Society of Japan
3. January 2019–December 2024. Editorial board member of the Society for the Study of Species Biology, Japan
4. October 2023–November 2024. Guest editor for the special issue “Ecology and Evolution” in *Plant and Cell Physiology*
5. April 2020–December 2021. Reviewing editor of *Journal of Evolutionary Biology*
6. December 2022. Organizing committee member of the 52nd symposium of the Study of Species Biology, Japan, <https://sites.google.com/view/sssb2020shiga>
7. November 2016. Organizing committee member of 5th Japan-Taiwan Ecology Workshop, Kyoto, Japan, <https://sites.google.com/site/jtecolw5th/>
8. Total 54 peer-review activities verified by the Web of Science, <https://www.webofscience.com/wos/author/rid/N-7939-2013>.

## Active memberships in scientific societies

1. American Society of Naturalists (October 2017–Present)
2. Ecological Society of Japan (October 2011–Present)
3. European Society for Evolutionary Biology (December 2020–Present)

4. Japanese Society of Plant Physiologists (January 2018–Present)
5. Society for the Study of Species Biology (December 2010–Present)
6. Society of Evolutionary Studies, Japan (November 2024–Present)

## Organization of conferences

1. December 2019. **Sato Y**, Muranaka T. Cutting-edge technology of plant omics and phenotyping (in Japanese). The 51st Symposium of the Society for the Study of Species Biology, Miyazaki, Japan
2. March 2015. Sakata Y and **Sato Y**. Overview of evolutionary ecology of plant-herbivore interactions (in Japanese). Workshop 12: The 62nd Annual Meeting of the Ecological Society of Japan, Kagoshima, Japan

## Prizes and awards

1. 2 February 2018. Inoue Research Award for Early-career Scientists, Inoue Foundation for Science, Japan
2. 3 December 2016. Kataoka Award for Early-career Researchers, The Society for the Study of Species Biology, Japan
3. 2 March 2016. Ikushi Prize for Outstanding PhD Students, Japan Society for the Promotion of Science (JSPS), Japan [https://www.jsps.go.jp/english/e-ikushi-prize/awards\\_fy2015\\_01.html](https://www.jsps.go.jp/english/e-ikushi-prize/awards_fy2015_01.html)
4. April 2011–March 2015. Refund Exemption for Excellent Students, JASSO Scholarship, Japan

## Career breaks

- June 2024–September 2024. Parental leave at Hokkaido University, Japan

## Personal skills

### License

1. Japanese diver license
2. Swiss driver license

### Computer languages

1. R (package developer level)
2. Python (basic level)
3. Bash (basic level)

### Natural languages

1. English (proficient)
2. Japanese (native speaker)

---

## Conference contributions

1. **Sato Y.** Linking frequency-dependent selection and overyielding through genome-wide association study of plant neighborhood effects. *Evolution 2025 Virtual Conference* (29 May 2025, online talk)
2. **Sato Y.**, Shimizu-Inatsugi R, Takeda K, Nagano AJ, Shimizu KK. Genomic prediction of neighbor effects identifies key genotype pairs responsible for reduced herbivory in mixed planting. *72nd Annual Meeting of Ecological Society of Japan*, Sapporo, Hokkaido, Japan (17 March 2025, talk)
3. **Sato Y.**, Takahashi Y, Xu C, Shimizu KK. Detecting frequency-dependent selection through the effects of genotype similarity on fitness components. *biology<sup>24</sup>: The largest conference of organismal biology in Switzerland*, ETH Zurich, Switzerland (19 January 2024, poster)
4. **Sato Y.**, Shimizu-Inatsugi R, Takeda K, Nagano AJ, Shimizu KK. Genome-wide neighbor effects predict genotype pairs reducing herbivory in mixed planting. *Biodiversity Convention - From Science to Implementation*, Monte Verita, Ascona, Switzerland (27 June 2023, talk)
5. **Sato Y.**, Shimizu-Inatsugi R, Takeda K, Nagano AJ, Shimizu KK. Keystone pairs of *Arabidopsis* accessions increase plant resistance to field herbivory. In Concurrent 15: *Arabidopsis* relatives from laboratories to natural fields (organized by Prof. K.K. Shimizu and H. Kudoh). *The 33rd International Conference on Arabidopsis Research (ICAR2023)*, Chiba, Japan (7 June 2023, talk)
6. **Sato Y.**, Shimizu-Inatsugi R, Takeda K, Nagano AJ, Shimizu KK. Keystone genotype pairs increase plant resistance to herbivory. *Gordon Research Conference: Plant-Herbivore Interaction 2023*, Ventura, CA, USA (2 March 2023, poster)
7. **Sato Y.**, Shimizu-Inatsugi R, Takeda K, Nagano AJ, Shimizu KK. Keystone genotype pairs increase population-level resistance to herbivory. *SwissPLANT 2023 Symposium*, Les Diablerets, Switzerland (23 January 2023, talk)
8. **Sato Y.**, Shimizu-Inatsugi R, Nagano AJ, Shimizu KK. Neighbor GWAS: incorporating neighbor genotypic identity in genome-wide association study of field-grown *Arabidopsis thaliana*. ‘From place to space - Tracing the spatial dimension of plant sciences’ by *Plant Science Center Symposium 2022*, P30, ETH Zurich, Switzerland (7 December 2022, poster)
9. **Sato Y.**, Takahashi Y, Xu C, Shimizu KK. Detecting frequency-dependent selection using a genetic marker regression of fitness components. In: S24 ‘Progress and Prospects in Adaptation Genomics’. *The 2022 Congress of the European Society for Evolutionary Biology*, Prague, Czech Republic (18 August 2022, reviewed talk)
10. **Sato Y.**, Nagano AJ, Shimizu KK. Genomics of within-species mixed planting against insect herbivores. In: MON3-b ‘From the species to the individual: investigating plant diversity on the scale that matters most’ (organized by Drs. P. Villa and M.C. Schuman). *World Biodiversity Forum 2022*, Davos, Switzerland. (29 June 2022, reviewed talk) <https://www.worldbiodiversityforum.org/>
11. Kuzuhara H, Takimoto H, **Sato Y.**, Kanagawa A. Insect pest detection and identification method based on deep learning for realizing a pest control system. *The Society of Instrument and Control Engineers (SICE) Annual Conference 2020*. Chiang Mai, Thailand [changed into an online meeting due to COVID-19] (25 September 2020, talk)
12. **Sato Y.** Using personal legacy data to reveal the molting phenology of Japanese cicadas. In: S19 ‘Ongoing Cicada Research in East Asia’ (organized by Prof. J. Yikweon), *The 8th EAFES International Congress*, Nagoya, Japan (April 2018, invited talk)

And the other 7 English posters and 37 contributions in Japanese (5 invited talks, 10 talks and 23 posters)

## Outreach activities

1. “Exhibition of *Arabidopsis thaliana* worldwide” at the Faculty of Environmental Earth Science, Hokkaido University, Japan (8 June 2025, in Japanese)
2. Teaching assistant for making a botanical specimen at Japanese School in Zurich (Japanische Schule in Zuerich), Uster, Switzerland. (1 July 2023, in Japanese)

3. **Sato Y**, Sato S. (2016) 12-years cicada monitoring. *Proceedings of the Natural History Museum Mt. Fujiwara* 38:1–5 (in Japanese)  
-> Plain-text Japanese summary of Sato and Sato (2015) *Annals of the Entomological Society of America* 108(4):494–500.

## Preprint

1. **Sato Y\***. (2025) Negative frequency-dependent selection underlies overyielding through neighbor genotypic effects in *Arabidopsis thaliana*. **bioRxiv** <https://doi.org/10.1101/2025.05.14.654149>
2. Akram I, Rohr L, Shimizu KK, Shimizu-Inatsugi R, **Sato Y\***. (2025) Spatial heterogeneity of disease infection attributable to neighbor genotypic identity in barley cultivars. **bioRxiv** <https://doi.org/10.1101/2025.04.22.650038>
